

Dear FCC,

America is great because brilliant minds come here to make their visions a reality. It is precisely this freedom that allowed for the internet to be built on American soil. If we want to continue to lead the world in innovation, we need to keep the current Title 2 oversight of ISPs that preserve Net Neutrality. I've heard Ajit Pai try and make the case that bulldozing these protections would create more freedom to innovate but it's easy to see through his distortions. We know that getting rid of these laws would only favor corporate overlords. Do the right thing here and keep Title 2 oversight. Better yet, do the American thing.
